MATHATISED ESPORTS

Mathatised Esports Championship Series

Rocket League Competitions — Official Rules & Regulations

These Rules establish the standing rules governing Mathatised Esports Championship Series (MECS) Rocket League competitions operated by Mathatised Esports. Tournament-specific announcements supplement these Rules and govern the details of individual tournaments.

13.2 — Severability 34
13.3 — No Waiver 34
13.4 — Acceptance of the Rules 34

1. General Provisions

1.1 — Purpose of the Rules

- These Rules establish the framework for fair competition, competitive integrity, consistent tournament administration, participant conduct, match procedures, enforcement, and tournament operations.
- All participants are expected to understand and comply with these Rules together with the applicable tournament-specific rules and announcements.

1.2 — Tournament Organizer

- Mathatised Esports is the Organizer and Operator of the South Asia Premier League (MECS) and its individual tournaments.

1.3 — Mathatised Esports Championship Series

- MECS is the overarching Rocket League esports competition and brand operated by Mathatised Esports.
- Individual MECS tournaments, including 1v1, 2v2, and 3v3 competitions, are independent competitions unless Mathatised expressly announces a standings, points, ranking, or seasonal system.
- Mathatised may introduce connected seasons, points, rankings, or other league structures in the future through applicable tournament announcements or rule amendments.

1.4 — Applicability

- These Rules apply to Players, Teams, Captains/Points of Contact, registered substitutes, coaches, managers, owners, and other persons participating in or directly associated with an MECS tournament where applicable.
- A violation by an associated person does not automatically result in punishment of the entire Team. Team responsibility is determined according to the circumstances and the applicable enforcement provisions.

1.5 — Tournament-Specific Rules

- These standing Rules govern MECS competitions generally. Each tournament may publish additional tournament-specific rules and information, including format, dates, schedule, server region, number of slots, rank or MMR requirements, bracket structure, registration deadline, prize structure, and other competition details.
- Where a tournament-specific rule conflicts with these standing Rules, the tournament-specific rule takes precedence for that tournament only.

1.6 — Administrator Authority

- Mathatised Esports and its authorized Tournament Administrators have final authority over the interpretation, administration, and enforcement of these Rules.

- Participants may submit a review request through the official process, but submitting a request does not suspend or automatically change an administrative decision.

1.7 — Rule Amendments

- Mathatised Esports may amend, update, or clarify these Rules when reasonably necessary.
- Material changes will generally not be applied retroactively to an ongoing tournament unless necessary because of exceptional circumstances, competitive integrity, or proper administration.

1.8 — Exceptional Circumstances and Administrative Discretion

- These Rules are enforced as written by default. However, an authorized Tournament Administrator may make an exception where a genuinely exceptional circumstance makes strict application clearly unreasonable or would materially harm fair competition or tournament operations.
- An exception is discretionary, does not create an automatic right for another participant, and does not establish a permanent precedent.

1.9 — Independent Competition

- MECS is independently operated by Mathatised Esports and is not affiliated with, endorsed by, sponsored by, or officially connected to Epic Games, Psyonix, or the Rocket League Championship Series (RLCS), unless expressly stated otherwise.

2. Tournament Structure & Administration

2.1 — Tournament Format

- MECS may conduct 1v1, 2v2, 3v3, or other Rocket League formats.
- The exact format, match structure, series length, and competition stages are announced separately for each tournament.

2.2 — Tournament Schedule

- Before registration closes, Mathatised will generally publish expected match-time windows to help Teams plan availability.
- Published windows are planning information and are not a guarantee of an exact match time. Actual scheduling may depend on tournament structure, progression, match duration, and tournament operations.
- Teams must communicate known availability limitations before the schedule is announced. Mathatised will make reasonable efforts to accommodate such limitations but does not guarantee accommodation.
- Once the schedule is announced, Teams are expected to be available for their assigned matches.
- Day-of rescheduling requests are generally not entertained except in genuinely exceptional circumstances.
- Failure to participate in a scheduled match may result in a forfeit. Teams should not expect matches to be moved outside the published tournament window solely for convenience.

2.3 — Bracket and Competition Structure

- The competition structure for each tournament is determined by Mathatised and announced before competition.
- Possible structures include, without limitation, single elimination, double elimination, round robin, Swiss, group stages, or other formats.
- Advancement and elimination procedures are tournament-specific.
- If both Teams fail or refuse to participate in a scheduled match, the Administrators will determine the appropriate result based on the tournament structure, the circumstances, competitive integrity, and tournament continuity. Where a temporary bracket placement is required, an Administrator may use a random determination or other reasonable method and may subsequently correct the bracket as required by the tournament format.
- Teams may not mutually arrange or intentionally cause a scheduled match not to be played. Such conduct may be treated as a competitive-integrity violation rather than an ordinary forfeit.

2.4 — Tournament Capacity and Slots

- Each tournament's capacity and number of available slots will be announced separately.
- Capacity is normally fixed for that tournament. Mathatised may increase or decrease capacity where reasonably necessary and will communicate material changes where practicable.

2.5 — Registration

- Registration is generally first-come, first-served, provided that all applicable eligibility and tournament-specific requirements are satisfied.
- Registration must be completed before the announced deadline.
- A Team may register up to one substitute.
- Roster additions and changes are permitted until registration closes. Once registration closes, the roster is locked except where these Rules or an Administrator-approved exceptional circumstance permits otherwise.
- If a registered Team withdraws or fails to participate before the tournament begins, Mathatised may reopen the vacated slot or offer it to another eligible Team or Player at its discretion.

2.6 — Check-In and Match Readiness

- Teams must acknowledge match notifications through the designated MECS Discord communication process and remain reasonably reachable.
- The Team POC is the primary contact and should remain responsive. Players should be present in the Team's designated voice channel where applicable.
- Match credentials are normally provided before the scheduled start time.
- By the end of the applicable grace period, the required number of eligible players must be ready: 1v1 requires one Player, 2v2 requires two Players, and 3v3 requires three Players.
- A registered substitute may replace an unavailable Starter in accordance with the roster rules.
- If a Team does not have the required number of eligible Players by the applicable deadline, the shorthanded Team may choose either to play the match shorthanded (for example, 2v3, 1v2, or 1v3) or to forfeit the match. The opposing Team does not choose this outcome; the choice belongs to the shorthanded Team alone.
- Shorthanded play such as 2v3, 1v2, or 1v3 is optional, not required. If the shorthanded Team declines to play, the match is forfeited in accordance with these Rules.
- Players may not enter an active game on their own initiative. A Player or substitute arriving after a game begins may only participate from a subsequent game, subject to the roster rules. The only exception is a Player disconnect handled under Section 4.7, during which a registered substitute may enter or the disconnected Player may rejoin.
- Normally, the grace period is 10 minutes from the official scheduled match time. If match credentials were posted before the scheduled time, the deadline remains scheduled time plus 10 minutes. If credentials are posted after the scheduled time because of an administrative delay, the grace period runs 10 minutes from credential posting.
- An Administrator may grant additional time in a genuinely exceptional circumstance.

2.7 — Tournament Administration

- The current authorized Tournament Administrators are:
- Primary Tournament Administrator: Wali Hassan (Mathatised) — Discord: Mathatised.
- Secondary Tournament Administrator: Ali Hassan.

- No other person is currently authorized as an MECS Tournament Administrator.
- Only instructions and decisions issued by an authorized Tournament Administrator are official MECS administrative direction.
- Both authorized Administrators may administer matches, enforce Rules, manage brackets and results, handle disputes and match issues, communicate decisions, and exercise the discretion granted by these Rules.
- If Mathatised formally designates and announces an additional Tournament Administrator in the future, that person will have the same authority while holding that designation.

2.8 — Changes to Tournament Structure

- Once announced, a tournament's bracket and competition structure are generally locked.
- Mathatised may change the structure, schedule, advancement procedure, or other tournament mechanics when exceptional circumstances make such action reasonably necessary to preserve fair competition, competitive integrity, or tournament continuity.
- Material changes will be communicated to affected Teams where reasonably possible. Teams do not have a general right to require structural changes.

3. Player & Team Eligibility

3.1 — Age Requirement

- Players must be at least 13 years old, or older where a higher minimum age is required by applicable local law.

3.2 — Epic / Rocket League Account Requirements and Account History

- Players must compete using their main or primary Rocket League account unless an alternate account has been disclosed and expressly approved under Section 3.4.
- Alt, secondary, borrowed, shared, purchased, gifted, transferred, or otherwise unauthorized accounts are prohibited unless expressly approved under the alternate-account exception.
- Mathatised may review account history where appropriate to verify eligibility and the legitimacy of a Player's registered rank.
- The following lifetime-win thresholds are screening baselines for additional review and are not automatic proof of an alternate account or misconduct:
- C1: 500 lifetime wins; C2: 750; C3: 1,000; GC1: 1,500; GC2: 2,000; GC3: 2,500; SSL: 3,000.
- Additional review may consider lifetime wins, ranked matches, season history, account age and progression, peak rank, consistency of account history, and other publicly available information.
- A Player below a screening threshold is subject to additional verification or review, not automatic rejection or a finding of cheating.
- Evidence that an account is an unauthorized alternate, purchased, shared, borrowed, transferred, or otherwise improperly used may result in rejection, removal, disqualification, or other discipline under these Rules.
- Discovery of an unauthorized account after competition has begun does not prevent Mathatised from taking action.

3.3 — Registration and Account Verification Information

- Each registered Player must provide: Discord ID, Epic Games ID, and a Rocket League Tracker profile link.
- The Rocket League Tracker profile link is mandatory and serves as the primary account-verification reference. The Epic Games ID remains required.
- A Team may optionally submit a Team logo. Mathatised may provide or create a basic Team graphic where no logo is supplied.
- Players and Teams may optionally provide background, origin, playstyle, tactics, achievements, or other profile information for broadcast and promotional use. Such information is not itself an eligibility requirement unless expressly requested for verification.
- For 1v1, the Player submits their own information. For 2v2 and 3v3, the designated Team representative submits the required information for all registered Players.
- Providing the required information does not guarantee acceptance or eligibility.

3.4 — Main and Alternate Account Policy

- The main or primary Rocket League account is required unless an alternate account is expressly approved before the Player competes.
- An alternate account may be approved only when the Player discloses it before registration closes, provides the main account, gives a legitimate reason, provides reasonable supporting evidence where requested, and receives explicit approval from an authorized Tournament Administrator before competing.
- Providing an alternate account without explicit approval does not constitute authorization.
- Where an alternate account is approved, the main account remains the reference for seeding, rank/MMR, eligibility, and other applicable processes. The registration should identify that the Player is competing on an approved alternate account.
- An undisclosed or unapproved alternate account remains prohibited and may result in disqualification or further discipline.

3.5 — Player and Team Names

- Player and Team names must be appropriate for a professional esports broadcast and must comply with the Code of Conduct.
- Offensive, discriminatory, sexually explicit, excessively vulgar, or otherwise inappropriate names are prohibited.
- Names may not misleadingly impersonate another Player, Team, Administrator, organization, public figure, or Mathatised representative.
- Names may not improperly use or imply affiliation with Epic Games, Psyonix, Rocket League, RLCS, or Mathatised Esports.
- Mathatised may require a Player or Team to change a name at any time where reasonably necessary. Refusal to comply may result in removal from competition.
- Names should remain consistent throughout a tournament unless an Administrator approves a change.

3.6 — Team Roster and Captain / Point of Contact

- Roster limits are: 1v1 — one Starter plus up to one optional substitute; 2v2 — two Starters plus up to one optional substitute; 3v3 — three Starters plus up to one optional substitute.
- A substitute is optional and there may be no more than one registered substitute per Team.
- Each Team must designate one registered Player as its Captain / Point of Contact (POC) at registration.
- The POC is the Team's primary administrative and communication contact and is responsible for submitting Team information and handling official communications with Administrators.
- In 1v1, the Player is automatically their own POC. In 2v2 and 3v3, one registered Player must be designated as POC.
- The POC may be changed before registration closes. After roster lock, a POC change requires Administrator approval.

3.7 — Roster Changes, Substitutions and Roster Lock

- Roster changes are permitted until registration closes.
- After registration closes, the roster is locked. Post-lock changes are generally prohibited unless an exceptional circumstance is approved by an Administrator.
- A registered substitute may replace a Starter after roster lock without separate approval, provided the Team notifies an Administrator before the match so that match administration and opponent communication can be handled correctly.
- Substitution normally occurs between games in a series. The only exception is a Player disconnect handled under Section 4.7, where a registered substitute may enter the game during the pause.
- If no registered substitute is available and a required Starter cannot participate, the Team may choose to play shorthanded in accordance with Section 2.6, or the match will be forfeited if the Team elects not to play shorthanded.
- An Administrator may approve an exceptional roster change where circumstances genuinely warrant it. Such approval is discretionary and is not a general method for bypassing the roster lock.

3.8 — Player Exclusivity

- A Player may be registered to or compete for only one Team in the same tournament.
- This applies equally to Starters and substitutes.
- A Player may not compete for one Team while serving as a registered substitute for another Team in the same tournament.

3.9 — Multiple Teams and Organizational Associations

- The same organization, owner, manager, or other associated person may be involved with multiple Teams, provided each Team has a completely distinct Player roster.
- No Player may overlap between such Teams, including as Starter, substitute, Captain/POC, or other registered Player role.
- Teams may not use organizational relationships to circumvent Player exclusivity or other eligibility requirements.

3.10 — Team Eligibility and Verification

- Every Team and Player must satisfy these Rules and all tournament-specific requirements.
- Mathatised may verify eligibility at registration or at any later point.
- Players and Teams must provide accurate information and reasonably cooperate with verification.
- Verification may include account history, rank/MMR, roster information, registration details, and other relevant information.
- If ineligibility is discovered after registration or competition, an Administrator will review the circumstances and may apply an appropriate permitted consequence.
- Possible consequences include a warning, game loss, match loss/forfeit, removal of a Player, Team disqualification, loss of prize eligibility, or another penalty expressly permitted by these Rules.

- An individual violation does not automatically penalize the entire Team; however, serious violations involving the Team or materially affecting competitive integrity may justify Team-level action.

3.11 — Ownership, Management and Conflicts

- The same individual or organization may own, manage, or coach multiple Teams where otherwise permitted, provided the Teams maintain distinct rosters and comply with these Rules.
- Multiple organizational associations are not inherently prohibited.
- Collusion, match manipulation, sharing confidential competitive information, unfair coordination, and attempts to obtain an advantage through multiple-Team relationships are prohibited.
- Teams and associated persons may not circumvent these restrictions through another person, account, or organizational arrangement.
- Administrators may investigate suspected conflicts or improper coordination and take action under the enforcement provisions.

3.12 — Registration Submission and Confirmation

- Registration is submitted through the designated MECS Discord registration process.
- The Captain/POC is responsible for submitting the required Team and Player information.
- Registration submission does not itself guarantee acceptance.
- Mathatised reviews registrations for eligibility and applicable tournament requirements.
- Once a Team has been reviewed and accepted, Mathatised will add it to the designated Registered channel. Being added to the Registered channel means the Team is officially confirmed as registered.
- Registration confirmation may later be reversed if new information establishes ineligibility, inaccurate information, unauthorized account use, or a rule or integrity violation.

4. Gameplay & Match Procedures

4.1 — Match Settings

- Unless a tournament-specific rule states otherwise, MECS matches use standard Rocket League competitive settings.
- Standard settings include Rocket League, Standard mode, 5-minute games, no bots, no mutators, private matches, and a standard competitive arena designated by Mathatised.
- Match credentials are provided through the designated MECS process.
- Team size and server region are determined by the applicable tournament-specific rules.
- Players must use supported Rocket League platforms and normal competitive gameplay functionality.
- Any tournament-specific setting takes precedence for that tournament.

4.2 — Match Hosting, Server and Team Colors

- The Match Administrator creates and hosts the private match lobby unless the tournament-specific procedure states otherwise.
- Match credentials are provided through the designated MECS process.
- There is no fixed standing Blue/Orange assignment; team colors are determined by the game/lobby unless a tournament-specific instruction says otherwise.
- For a Middle East tournament, matches are played on ME4 unless an approved exception applies.
- If an incorrect server is used, such as ME6 instead of ME4, the match must be recreated on the correct server. New credentials are provided and Players must leave and rejoin the corrected lobby.
- Teams should notify the Administrator promptly when an incorrect server or material lobby issue is identified.

4.3 — Match Start and Player Readiness

- The Match Administrator waits for the required Players to enter the lobby.
- The Administrator may ask both Teams to confirm readiness before starting the game.
- Once all required Players have confirmed readiness, the Administrator starts the match.
- The normal Rocket League in-game countdown is the game start procedure.
- A Player arriving within the applicable grace period may participate, subject to the roster rules.
- If a Player disconnects before a match begins, the Administrator may wait a reasonable short period. If the issue continues, an eligible registered substitute may be used. If the required roster cannot be fielded, a forfeit may apply.
- Additional time may be granted only where an Administrator determines that an exceptional circumstance justifies it.

4.4 — Match Results and Bracket Updates

- The Match Administrator records the official game and series result and updates the bracket or applicable tournament record.
- Teams must remain available to confirm or resolve material discrepancies.
- Administrators may request screenshots, replays, recordings, or other evidence where a result is disputed or questioned.
- False, altered, fabricated, or misleading match information may result in disciplinary action.

4.5 — Match Lobby Access and Observers

- Only authorized persons may join an MECS match lobby: participating Players, registered substitutes, coaches associated with participating Teams, authorized MECS casters, and authorized Tournament Administrators.
- Friends, spectators, unregistered Team members, and other unauthorized observers may not join.
- Teams may not invite unauthorized persons even if both Teams agree.
- An Administrator may prevent or remove an unauthorized participant.

4.6 — Server Region and Server Selection

- The tournament announcement designates the server region.
- The designated region normally remains fixed throughout the tournament.
- Where the designated region is Middle East, ME4 is the required server unless an approved exception applies.
- A different server region may be used only when both Teams agree and an authorized Tournament Administrator approves the change before the match is played on that region.
- Approved server exceptions may be recorded or communicated by the Administrator.

4.7 — Disconnects and Technical Issues

- Individual Player Disconnect: If a Player disconnects, the game will be paused by the Match Administrator and a two-minute timer starts.
- If the disconnected Player returns before the timer ends, the Player may rejoin and the game resumes with the full roster.
- If the Player has not returned, a registered substitute may enter the game during the pause, subject to the roster and substitution rules.
- If the Player has not returned and no registered substitute is available, the affected Team continues the game shorthanded once the two-minute timer ends.
- The pause will not be extended beyond two minutes. When the timer ends, the game resumes whether or not the disconnected Player has returned.
- A Player who returns after the two-minute timer has ended may still rejoin the game upon returning, unless a registered substitute has already entered; the game will not be paused again to wait for that Player.

- If the game ends while a Player is disconnected, the Player may rejoin from the next game of the series, or a registered substitute may participate in the next game.
- If the original Player returns while a substitute is playing, the original Player must wait until that game ends before replacing the substitute.
- Repeated disconnects are handled under the same principles. Teams are responsible for maintaining a stable connection and eligible roster, subject to Administrator discretion in exceptional circumstances.
- Full Lobby / Server Disconnect: If all Players are disconnected from the match, the Administrator records the game state at the moment of the full disconnect, including time, score, and other relevant information.
- A new lobby may then be created and the game resumed from the established game time and score. Goals scored before the full disconnect remain valid; scoring after the disconnect and before the authorized resumption does not count.
- Administrator Disconnect: If the Match Administrator disconnects, the game continues without an automatic pause. The Administrator will attempt to reconnect promptly.
- If necessary, the Administrators may designate another authorized person to temporarily monitor or administer the match.
- If no replacement Administrator can join, Teams must truthfully report the relevant game and series results to the Administrator at the end of the game or series, and the result will be verified and recorded as soon as practicable.
- Individual Connection Problems: A Player is responsible for maintaining a stable connection. Poor connection quality that does not cause a disconnect does not automatically stop or restart a game. No restart is required solely because of one Player's unstable connection.

4.8 — Pauses and Team Timeouts

- Players and Teams may not request or initiate pauses during an active game. Pauses are only allowed in situations such as a Player disconnect under Section 4.7.
- Only a Match Administrator may pause a game, and only for a disconnect under Section 4.7 or where necessary for administrative, technical, or exceptional reasons.
- Each Team receives one two-minute timeout per series.
- A Team may request its timeout only between completed games, after a game has ended and before the next game begins.
- Timeouts do not carry over to another series.
- The Administrator controls when play resumes after a timeout.

4.9 — Forfeits and Match Concessions

- A Team may not voluntarily forfeit an active series merely because it does not wish to continue.
- A Team may not intentionally concede while it remains able to field its required roster, regardless of the current score.

- If a genuine circumstance makes continuation impossible, such as a Team losing a required Player and having no eligible substitute, the Team may notify an Administrator. The Administrator may award the remaining match or series to the opponent.
- Deliberate or unnecessary concessions intended to manipulate competition may be treated as a competitive-integrity violation.

4.10 — Game and Series Abandonment

- Players and Teams are expected to continue a match unless a legitimate circumstance prevents continuation.
- Intentional stopping, refusal to continue, deliberate throwing or giving of games or series, or leaving a match lobby without legitimate reason is prohibited.
- Players may not pause an active game to discuss or request a concession. The game continues under the normal procedures.
- Technical problems should be reported promptly, but a technical complaint does not automatically pause the game.
- Leaving a lobby without authorization or a legitimate explanation may be treated as abandonment.
- Intentional abandonment or refusal to continue may result in disqualification from the current tournament and/or a future MECS suspension or ban, subject to the available penalties and circumstances.
- Genuine inability to continue is handled under the applicable roster and forfeit provisions and is not automatically misconduct.

4.11 — Match Replays and Evidence

- Teams are not generally required to save or retain replays.
- Where a dispute, complaint, or competitive-integrity concern arises, an Administrator may request replays, screenshots, videos, recordings, or other relevant evidence.
- Participants making a claim should provide supporting evidence as soon as reasonably possible.
- Where evidence is necessary to resolve a current series, the Administrator may specify a submission period, normally around 30 minutes or another period appropriate to the circumstances.
- Participants must cooperate with reasonable evidence requests.
- Fake, altered, fabricated, manipulated, or deliberately misleading evidence is prohibited.
- Refusal to reasonably cooperate with an evidence request may be considered in enforcement.

4.12 — Match Communication and Administrator Instructions

- After registration, each Team is provided a designated communication channel within the official MECS Discord.
- That Team channel is the primary operational channel for match information, credentials, schedule information, and Administrator instructions.

- The POC is the primary communication contact. If unavailable, an Administrator may communicate with another registered Player or appropriate Team representative.
- Teams should remain reasonably reachable and attentive in the designated Discord voice/channel environment during their scheduled match window.
- Teams and Players must follow reasonable Administrator instructions concerning lobbies, servers, match procedures, evidence, and tournament operations.
- Deliberately ignoring or refusing a reasonable Administrator instruction may result in disciplinary action.

4.13 — Coaches, Substitutes and Team Representatives

- A registered substitute and a registered Team coach may join the designated Team Discord voice channel and communicate with active Players during games and between games.
- Coach and substitute communication must occur through the designated Discord voice channel or another authorized communication method, not through prohibited or exposed means.
- Active Players may use normal Rocket League in-game communication and Quick Chat.
- An authorized coach or registered substitute may spectate the Team's match from the lobby where the tournament setup permits it.
- A registered substitute may replace an active Player between games, or during a disconnect pause under Section 4.7, subject to the roster and substitution rules.
- Only active Players, registered substitutes, registered coaches, authorized Tournament Administrators, and authorized MECS casters may use match-lobby credentials.
- Teams must not share match credentials with unauthorized persons.

4.14 — Coaching and Outside Assistance

- A registered coach may provide tactical, strategic, and technical instructions to the Team during an active game.
- A registered substitute may provide the same type of Team assistance.
- Coach and substitute communication must occur through the designated Team Discord voice channel.
- Normal Rocket League Quick Chat remains available to active Players.
- Authorized coaches and substitutes may use legitimate observation information for live instruction.
- Replay analysis and legitimate analytical tools are permitted where they do not provide prohibited real-time competitive assistance.
- No person outside the registered Team or otherwise authorized MECS personnel may provide live information, coaching, tactical instructions, or competitive assistance directly to a Team during a match.
- Public livestream chat or general spectator commentary is not treated as authorized Team communication; this rule concerns direct intervention or deliberate communication with the Team.

- Unauthorized outside assistance or attempts to circumvent this rule may result in discipline.

4.15 — Game Bugs, Exploits and Unauthorized Modifications

- Players may not intentionally exploit bugs, glitches, or unintended mechanics to obtain a competitive advantage.
- Unauthorized modification of the Rocket League client, game files, or tournament environment is prohibited.
- Macros, automated inputs, scripts, cheats, or software or hardware that provides an unfair competitive advantage are prohibited.
- Third-party tools or modifications may not be used to provide prohibited assistance or alter normal competitive gameplay.
- BakkesMod and similar tools are not prohibited merely by name; legitimate cosmetic or analytical functionality is not automatically a violation, but any use that provides an unfair competitive advantage or prohibited assistance is prohibited.
- Intentionally discovering, using, sharing, or continuing to exploit a known competitive exploit may result in discipline.
- Administrators may investigate suspected exploits and request relevant evidence.

4.16 — Account Sharing and Player Identity

- Only the registered Player may play on the registered Rocket League/Epic account.
- Allowing another person to play on a registered account is prohibited, even with the account holder's permission.
- Using another person's account is prohibited.
- An Administrator may request reasonable account or identity verification where a legitimate concern exists, and the Player must cooperate.
- Discovery of account sharing or identity misuse after a match does not prevent disciplinary action.
- Action may apply to the individual Player, the Team, or both depending on the circumstances.
- Approved alternate accounts are governed exclusively by Section 3.4.

4.17 — Match Integrity and Collusion

- Match fixing, collusion, intentional result manipulation, deliberate throwing, coordinated outcomes, bribery or benefits intended to influence a match, sharing confidential competitive information for unfair advantage, coordinated mutual no-shows, and deliberate attempts to undermine a legitimate competitive outcome are prohibited.
- Administrators may investigate suspected integrity violations and apply the permitted disciplinary measures based on severity, intent, competitive impact, and other circumstances.

5. Match Issues, Disputes & Records

5.1 — Technical Issues

- Players and Teams may report technical problems to an Administrator through the official support process.
- Teams do not need the opposing Team's agreement to report a technical issue.
- A one-Player disconnect is handled under Section 4.7.
- A technical complaint does not automatically pause, restart, or replay a game.
- An Administrator may review the issue after the game or series and determine the appropriate action.
- Where a server-wide or full-lobby failure materially affects the game, the Administrator may apply the full-disconnect procedure or another remedy permitted by these Rules.

5.2 — Administrative Intervention and Emergency Action

- An Administrator may intervene during an active game or series when necessary for proper administration, competitive integrity, participant safety, or another exceptional circumstance.
- An Administrator may pause, continue, stop, or otherwise direct the match where permitted by these Rules.
- Players and Teams must follow the Administrator's instructions.
- Any resulting disciplinary action must be within the penalties and authority provided by these Rules.

5.3 — Match Disputes and Challenges

- Formal disputes and challenges must be submitted through the official Mathatised Esports Discord ticket system.
- The Captain/POC should normally raise a dispute. If the POC is unavailable, another registered Player or authorized Team representative may do so.
- Outsiders do not have authority to file a dispute on behalf of a Team unless an Administrator permits it.
- Disputes should be raised immediately or as soon as reasonably possible after the relevant event.
- Participants should report a suspected violation or tournament issue directly to Mathatised before circulating the matter to friends, other Teams, public communities, or other unauthorized individuals.
- Only the authorized Tournament Administrators — currently Wali Hassan (Mathatised) and Ali Hassan — are the designated people to whom such matters should first be reported.
- If an Administrator determines that a participant deliberately shared or circulated the information with unauthorized persons before reporting it to Mathatised, Mathatised may reject, decline to consider, or nullify the claim.

- Good-faith reporting and legitimate evidence submission to an Administrator are not prohibited by this requirement.
- Submitting a dispute does not automatically pause a tournament or bracket. Unless an Administrator instructs otherwise, competition continues.
- Teams should not publicly circulate a dispute or attempt to resolve it through other Teams or public channels before bringing it to Mathatised.
- Knowingly false, misleading, or bad-faith disputes may result in discipline under the applicable Rules.
- Administrative decisions are subject to the finality provisions in Section 12.

5.4 — Match Result Finality

- The Match Administrator's recorded result and bracket update constitute the official tournament record.
- Once a result has been recorded and the bracket has advanced, the result is normally final.
- An Administrator may correct or change a recorded result where new material information, a Rules violation, a competitive-integrity issue, an administrative error, or an exceptional circumstance requires corrective action.
- Possible corrective action may include reversal of a result, Team disqualification, bracket adjustment, replay, or another action expressly permitted by these Rules.
- Teams do not have a general right to reopen a result merely because they disagree with it.

5.5 — Official Tournament Records

- Official tournament records include brackets and results maintained by Mathatised, official announcements, registration and roster records, and administrative decisions communicated through official MECS channels, including designated private Team channels and tickets.
- Third-party claims, private conversations outside official channels, and screenshots of unofficial statements are not themselves official tournament records.
- Administrators may nevertheless consider unofficial information as supporting evidence where it is relevant and credible.

6. Communication & Support

6.1 — Official Support and Contact Channels

- The official support method for MECS is the Mathatised Esports Discord ticket system.
- Players and Teams should create a ticket for registration matters, tournament administration, technical issues, disputes, complaints, verification matters, and other issues requiring Administrator attention.
- Formal disputes and reports are governed by Sections 5.3 and 7.7.
- Post-registration operational match communication remains in the designated private Team channel.

6.2 — Official Administrative Communication

- The current authorized Tournament Administrators are Wali Hassan (Mathatised), Discord: Mathatised, and Ali Hassan.
- Only an authorized Tournament Administrator may issue official administrative decisions or directions.
- Statements by helpers, moderators, staff, or other persons are not official administrative decisions unless that person has been formally designated and announced as a Tournament Administrator.
- Players and Teams are responsible for checking designated MECS Discord channels and remaining reasonably reachable.
- Verbal Administrator instructions and decisions carry authority. Where written communication conflicts with an earlier verbal statement, the written communication controls.
- Critical decisions should be documented in writing where reasonably practicable.

7. Code of Conduct & Competitive Integrity

7.1 — General Conduct

- Participants must conduct themselves professionally and respectfully throughout MECS.
- Normal competitive banter and trash talk are permitted when they do not become harassment, threats, discrimination, targeted abuse, intimidation, or deliberate disruption.
- Harassment, threats, discrimination, targeted abuse, intimidation, and deliberate disruption of tournament operations or official channels are prohibited.
- Impersonating a Player, Team, Administrator, or Mathatised representative is prohibited.
- Conduct outside the tournament may be considered where it is directly connected to MECS or materially affects participants, tournament operations, or competitive integrity.

7.2 — Harassment, Discrimination and Personal Attacks

- Hate speech, slurs, or discriminatory conduct targeting protected characteristics are prohibited.
- Sexual harassment or sexually abusive conduct is prohibited.
- Threats of violence, physical harm, or credible unlawful retaliation are prohibited.
- Doxxing or sharing another person's private information without authorization is prohibited.
- Encouraging, organizing, or directing others to harass, threaten, or target a participant is prohibited.
- Repeated unwanted contact or targeted abuse is prohibited.
- Sharing private conversations, images, recordings, or personal material with the intent to harass, embarrass, threaten, or target another participant is prohibited.
- Retaliation or intimidation against a person for reporting a violation or cooperating with an investigation is prohibited.

7.3 — Wagering and Gambling

- Players, substitutes, coaches, Team representatives, and other participants may not bet or wager on MECS matches or tournaments.
- Participants may not arrange, facilitate, promote, encourage, or profit from wagers connected to MECS.
- Participants may not use tournament information, access, relationships, or position to obtain a gambling-related advantage.
- Circumvention through another person or account is also prohibited.

7.4 — Fraud, Deception and Misrepresentation

- Participants must provide accurate and truthful information to Mathatised and its Administrators.
- Knowingly false, misleading, deceptive, or materially incomplete information is prohibited.
- This applies to registration, identity, roster information, rank or eligibility information, match claims, evidence, administrative communications, and other matters governed by these Rules.

- Participants may not conceal relevant information or misrepresent circumstances to obtain an advantage or avoid enforcement.
- Using another person, account, or intermediary to carry out deceptive conduct does not avoid responsibility.

7.5 — Confidentiality and Private Information

- Participants must respect the confidentiality of private tournament communications and information shared with them by Mathatised or another participant.
- Private communications in Team channels, administrative tickets, and other restricted channels should not be publicly shared or circulated without authorization.
- Information submitted privately during a dispute, investigation, or verification process should not be publicly disclosed while the matter is being reviewed.
- Participants must not share another participant's private or personal information without authorization.
- An Administrator may instruct a participant to keep specific information confidential where necessary to protect an investigation, another participant, or tournament integrity.
- Deliberate disclosure of confidential information that disrupts an investigation, harms a participant, or undermines tournament operations may result in disciplinary action.

7.6 — Illegal Conduct and Threats

- Participants must not engage in illegal conduct connected to MECS or its participants.
- This includes unlawful actions intended to interfere with tournament operations, harm another participant, obtain an unfair competitive advantage, or compromise another person's security or account.
- Threats of violence, physical harm, or unlawful retaliation are prohibited.
- Conduct specifically prohibited elsewhere in these Rules remains subject to those provisions; this section does not replace them.

7.7 — Reporting Violations

- Any participant may report a suspected violation, regardless of whether they were directly involved.
- Reports must be submitted through the official Mathatised Esports Discord ticket system.
- Reports should include relevant information and evidence available to the reporting participant.
- Participants who make a report in good faith will not be subject to retaliation or discipline merely because the report is ultimately not substantiated.
- Knowingly false, deliberately misleading, or malicious reports may result in disciplinary action.
- Participants must cooperate honestly with any resulting investigation or reasonable requests for additional information.
- The reporting-before-circulation requirement is governed by Section 5.3.

8. Enforcement & Disciplinary Measures

8.1 — Enforcement Authority

- Mathatised Esports and its authorized Tournament Administrators are responsible for enforcing these Rules.
- Administrators may investigate suspected violations and take action during or after a tournament.
- Only authorized Tournament Administrators may issue official disciplinary decisions.

8.2 — Available Disciplinary Measures

- Administrators may apply the following penalties where permitted and appropriate: warning; game loss; match loss or forfeit; removal of a Player from a match or tournament; Team disqualification; loss of prize eligibility or prize; suspension from a future MECS tournament; permanent or extended ban from MECS.
- Any other corrective action may be used only where it is expressly authorized elsewhere in these Rules.

8.3 — Determining the Appropriate Penalty

- Administrators determine the appropriate permitted penalty based on the circumstances of the violation.
- Relevant factors may include severity, intent, competitive impact, whether the conduct was repeated, cooperation, and other surrounding circumstances.
- Repeated, deliberate, or materially harmful violations may result in more severe penalties.
- No particular violation is required to receive an identical penalty in every circumstance.

8.4 — Individual and Team Responsibility

- A violation by an individual does not automatically result in punishment of the entire Team.
- Administrators determine whether the circumstances justify an individual penalty, Team penalty, or both.
- The decision may consider the severity of the violation, the Team's involvement or benefit, and the effect on competition.

8.5 — Immediate Enforcement

- Administrators may take immediate action during an active tournament when necessary to protect competitive integrity, participants, or tournament operations.
- This may include removing a Player or Team from an active match or tournament where the action is within the permitted disciplinary measures.
- Administrators do not need to wait until a tournament has concluded to enforce these Rules.
- Material disciplinary decisions should be communicated to the affected participant or Team and recorded through official MECS communication where reasonably practicable.

8.6 — Investigations and Cooperation

- Participants must cooperate with reasonable requests from an authorized Tournament Administrator during an investigation.
- Participants must provide truthful and accurate information when requested.
- Administrators may request relevant evidence, records, screenshots, replays, recordings, account information, or other information reasonably necessary to investigate a suspected violation.
- Refusing to cooperate, intentionally withholding relevant information, or providing false or misleading information may result in disciplinary action under these Rules.
- Cooperation with an investigation does not prevent a participant from reporting a matter or submitting relevant evidence through the official ticket process.

9. Tournament Disclaimers, Suspension & Cancellation

9.1 — Technical Issues and Service Interruptions

- Mathatised Esports is not responsible for technical problems outside its reasonable control, including Rocket League servers, network outages, platform failures, or other third-party service disruptions.
- Players and Teams remain responsible for their own internet connection, hardware, software, and ability to participate.
- Where a technical issue materially affects a match or tournament, the Administrators may determine the appropriate course of action under these Rules.
- A technical issue does not automatically require a restart, replay, or rescheduling.

9.2 — Unforeseen and Exceptional Circumstances

- Mathatised may take reasonable action when circumstances outside normal tournament operations materially affect the competition.
- Examples include major server or platform outages, widespread connectivity problems, security incidents, natural disasters or emergencies, unauthorized interference with tournament operations, or other circumstances that make continuing as originally planned impractical or unfair.
- Administrators may adjust the schedule, match procedures, or other tournament arrangements where reasonably necessary.

9.3 — Suspension or Cancellation

- Mathatised may temporarily suspend, postpone, or cancel a tournament where necessary because of exceptional circumstances.
- If a tournament is suspended or postponed, Mathatised will communicate revised scheduling or further instructions when reasonably possible.
- If a tournament is cancelled, prize distribution and outstanding tournament matters will be handled according to the circumstances and applicable tournament-specific terms.

9.4 — Administrative Errors

- If an administrative error affects a match, bracket, schedule, or other tournament matter, Mathatised may correct the error where reasonably possible.
- Correction may include updating a result, adjusting a bracket, rescheduling a match, or taking another action expressly permitted by these Rules.
- An administrative error does not automatically create a right to compensation, replay, or another remedy.

9.5 — No Automatic Entitlement

- Participation in MECS does not guarantee that a tournament will proceed exactly as originally scheduled or announced.

- When exceptional circumstances require action, the Administrators determine the appropriate response in accordance with these Rules and the need to preserve fair competition, competitive integrity, and tournament continuity.

10. Media, Broadcast & Publicity

10.1 — Broadcast and Recording

- Mathatised Esports owns and operates MECS and may record, stream, cast, broadcast, clip, archive, and otherwise publish MECS matches and tournament content.
- This may include official Mathatised channels such as YouTube, Twitch, social media, and other official MECS or Mathatised platforms.
- Players and Teams participating in MECS acknowledge that their matches may be broadcast or recorded.

10.2 — Names, Teams and Competitive Content

- Mathatised may use registered Players' in-game names, actual names where provided and appropriate, Team names, Team logos, gameplay footage, match results, statistics, rankings, and other tournament-related information for broadcasts, coverage, archives, and promotional purposes.
- Submitted Team and Player media may also be used for MECS-related content and promotion.

10.3 — Private and Sensitive Information

- Mathatised will not publicly disclose information submitted privately for tournament administration where that information is sensitive or reasonably expected to remain private.
- This includes payment details, account/payment credentials, and other confidential administrative information.
- Public competitive information such as in-game names and relevant Player/Team information used for casting or tournament coverage is not considered private merely because it was submitted during registration.
- If a participant specifically requests that particular non-essential personal information not be used publicly, Mathatised may take that request into consideration where reasonably possible.

10.4 — Interviews and Media Participation

- Mathatised may invite participating Teams or Players for pre-match, post-match, or other MECS-related interviews and content.
- When a Team is requested for an interview, at least one Team member, preferably the designated Captain/POC, should participate on behalf of the Team.
- Teams may have additional or all Team members participate where appropriate.
- Interview participation does not require every Team member to appear unless specifically requested by Mathatised.

11. Prize & Payment Regulations

11.1 — Prize Pool and Paid Placements

- Each tournament's prize pool, currency, and number of paid placements are announced separately.
- Only Players and Teams that remain eligible under these Rules at the time of payment are eligible to receive prizes.
- Mathatised may withhold or remove prize eligibility where a Player or Team is disqualified or otherwise loses eligibility under these Rules.

11.2 — Prize Recipient

- For each paid placement, the winning Team must designate one person to receive the Team's prize.
- The designated recipient is responsible for distributing the Team's prize among its teammates.
- Mathatised is not responsible for resolving disputes between teammates regarding the internal division of a Team prize after payment has been made to the designated recipient.

11.3 — Payment Method and Country

- For Pakistani winners, Mathatised Esports handles the Pakistani prize transfer.
- For international winners, the applicable sponsor directly makes the international prize transfer to the winning recipient or Team.
- The responsible payment party and method may be confirmed with the winners after final placements are established.

11.4 — Prize Payment Timing

- Prize payments will generally be made within seven (7) working days of the final results being confirmed for the applicable tournament, subject to timely provision of the required funds and recipient information under this Section.
- International payments may take additional time because of international transfer processing and requirements outside Mathatised's direct control.

11.5 — Recipient Unable to Receive Payment

- If a winning Player cannot reasonably receive the prize directly, Mathatised may allow the Player to nominate another person, such as a parent, guardian, or family member, to receive payment on the Player's behalf.
- Any such arrangement requires Administrator approval and may require reasonable verification of the relationship and authorization.

11.6 — Required Payment Information

- Prize recipients must provide accurate payment information requested by Mathatised or the applicable sponsor.
- Incorrect, incomplete, or misleading payment information may delay payment.
- Sensitive payment information is private administrative information and will not be publicly disclosed.

11.7 — Prize Eligibility After Disqualification

- A Player or Team that is disqualified may lose some or all prize eligibility depending on the circumstances and applicable disciplinary decision.
- Where a prize has already been paid, Mathatised may take corrective action only where expressly permitted by these Rules.

11.8 — Sponsor-Funded Prizes

- Where a tournament prize pool is provided or funded by a sponsor, the sponsor remains responsible for providing the committed prize funds.
- Mathatised may facilitate distribution of sponsor-provided funds to eligible winners in accordance with these Rules.
- Mathatised does not assume responsibility for a sponsor’s failure, withdrawal, delay, or refusal to provide committed prize funds.
- If a sponsor fails to provide committed funds, Mathatised is not responsible for paying the unpaid portion from its own funds.
- Mathatised will communicate material payment issues to affected winners and may assist with communication or coordination with the sponsor where reasonably possible.

12. Appeals, Reviews & Final Decisions

12.1 — Request for Review

- A Player or Team affected by an administrative or disciplinary decision may submit a review request through the official Mathatised Esports Discord ticket system.
- The request should identify the decision and provide any genuinely relevant new information or evidence.
- Submitting a review request does not suspend the decision or require tournament operations to stop.

12.2 — Administrative Review

- An authorized Tournament Administrator may consider a review request where appropriate, particularly where genuinely new material information, evidence, or an administrative error is identified.
- A review request does not create a right to a different decision and does not require an Administrator to reconsider a matter solely because a participant disagrees with the original decision.
- Any corrective action must remain within the authority and penalties expressly provided by these Rules.

12.3 — Finality of Administrative Decisions

- Any decision made by an authorized Tournament Administrator is final and binding for MECS purposes.
- It does not matter which authorized Administrator makes the decision.
- A decision made by Wali Hassan (Mathatised), Ali Hassan, or another person formally designated and announced as a Tournament Administrator carries the same administrative authority.
- There is no requirement for another Administrator to approve, review, or confirm a decision before it takes effect.
- Any subsequent correction or change can occur only where an authorized Administrator determines that action is permitted and necessary under these Rules, such as to correct a material administrative error or address genuinely new material information.

12.4 — Tournament Continuity

- A review request does not automatically delay matches, bracket progression, or tournament operations.
- Unless an Administrator instructs otherwise, participants must continue following the published schedule and applicable administrative directions.

13. General Provisions

13.1 — Interpretation of the Rules

- These Rules provide a consistent framework for MECS competitions while allowing Administrators to address circumstances not expressly covered.
- Where a provision is unclear, an authorized Tournament Administrator may interpret it in accordance with the purpose and principles of these Rules.
- Administrative interpretation does not permit an Administrator to impose a type of penalty that is not authorized by these Rules.

13.2 — Severability

- If any provision of these Rules is determined to be invalid, unenforceable, or otherwise inapplicable, the remaining provisions continue to apply to the extent reasonably possible.

13.3 — No Waiver

- A failure by Mathatised Esports or an Administrator to enforce a provision in one situation does not prevent that provision from being enforced in another situation.
- An exception or discretionary decision made for one participant or circumstance does not automatically create a precedent or entitlement for another participant.

13.4 — Acceptance of the Rules

- By registering for or participating in an MECS tournament, Players and Teams acknowledge that they have read, understood, and agree to comply with these Rules and applicable tournament-specific rules.
- Participation constitutes acceptance of the authority of Mathatised Esports and its authorized Tournament Administrators to administer and enforce the competition.

Mathatised Esports — Mathatised Esports Championship Series
